

## Process Engineer, Enzyme Recovery, Novozymes Kalundborg

---

**Are you looking for new challenges in a fast-paced environment where not two days are the same? If so, you could be one of our new colleagues in the strong Process Support Team in Recovery KA.**

### **Pioneer a brighter future**

**At Novozymes, everyone works in close partnership with the customers and the global community to make a sustainable impact. Novozymes use science to advance industries, and as part of Supply Operations, you will help produce and deliver the biological solutions that boost the customers business and make innovation a reality.**

### **Responsibilities:**

As a Process Engineer you will be part of a dedicated team. This team of skilled engineers with diverse experience has the responsibility to support the daily recovery production, introduce new products and equipment to recovery production and continuously improve the production process together with the skilled operators.

The team is the skilled knowledge bank who ensures our production consistently is tuned to meet required specifications. Novozymes works to optimize production cost and also strives to engage their people and equipment to perform at its best. You will need to translate your scientific understanding into everyday real-life big scale production control.

Furthermore, you will be part of cross-functional teams working together to develop the next generation of enzyme recovery products and ensure that these are brought efficiently into the market.

You combine scientific talent with practical and communication skills and are as comfortable solving short-term problems as you are optimizing processes to improve long-term productivity. If you are a motivated person with a strong drive looking for a place to develop your scientific and personal skills, this is a fantastic opportunity to realize your potential in an international environment.

### **I this position, you must:**

- Have an education as BSc or MSc in Chemical engineering, Biochemical engineering or Food Technology
- Have experience with commercial scale production

- Have good understanding of Food safety and hygiene is not mandatory, but is a plus
- Be proactive and ready to take responsibility
- Be excellent in written and oral communication in Danish and English
- Thrive working in multiple simultaneous activities
- Have knowledge of LEAN is a plus
- Have great drive and proactive behavior
- Make and maintain relationship at all levels

### **About Novozymes**

Novozymes is the world leader in biological solutions. Together with customers, partners and the global community, Novozymes improves industrial performance while preserving the planet's resources and helping build better lives. As the world's largest provider of enzyme and microbial technologies, our bio-innovation enables higher agricultural yields, low-temperature washing, energy-efficient production, renewable fuel and many other benefits that we rely on today and in the future. Novozymes call it Rethink Tomorrow. [www.novozymes.com](http://www.novozymes.com)
